NEW VISTA PPT THREAD MACHINES

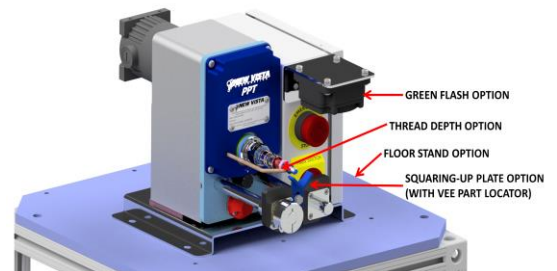

— Inexpensive push-pull machines for thread resizing, thread verifying, chasing or retapping —

**A PPT with custom tooling
and green flash option**

NEW VISTA BASIC PPT

BASIC PPT WITH OPTIONS

PPT FEATURES:

- ◆ All electric. Available in 220 vac or 120 vac. It's portable.
- ◆ Supplied standard with New Vista 62020AC composite clutch and Type FP quick-change chuck.
- ◆ Will follow existing thread. It won't crossthread (with the Squaring-up Plate).
- ◆ Tools won't jam in the threads (reverse-out is at higher torque than run-in).
- ◆ Won't tear up the mouth of the thread (won't damage the thread at entry).
- ◆ No programming required at all.
- ◆ Tool Adapters available to run any gage or remediation tool and any shank configuration: taper shank, straight shank, all-threaded and Type BH.
- ◆ No operator training required.
- ◆ High torque on demand without operator effort.
- ◆ Variable speed settings: from 0 to 1,400 rpm.
- ◆ Slow-start feature is available with the basic unit.
- ◆ When used for thread verifying, cycles of 1 second are often attained (the operator's part-handling time will be in addition to this).
- ◆ Complete changeover in seconds.
- ◆ Green light illuminates when correct thread depth has been achieved (with the Thread Depth Option).
- ◆ Can be run freehand, without any fixturing. But for fast cycles, order the Squaring-up Plate.
