— Servo-driven Tappers with ballscrew advance —

Basic AR Tapping Unit

An AR Tapper for a high volume
slidedown line.

AR TAPPING UNIT FEATURES:

- ◆ Servo-driven. Available in 440 vac or 220 vac.
- ◆ Ballscrew/ballspline mechanism provides many millions of maintenance-free cycles.
- ◆ Built for high-reliability continuous service and long production runs.
- ◆ Available with a variety of chucks and toolholders.
- ◆ Capacity: Thread sizes from M5 through M16 in steel (#10 through 5/8" U.S.).
- ◆ Supplied with Touchscreen HMI.
- ◆ Variable rpm settings: from 0 to 1,400 rpm.
- ◆ Slow-start feature is available with the basic unit.
- ◆ Parts always available for immediate shipment.

APPLICATIONS ASSISTANCE:

- ◆ An Application Form is available from the New Vista website: <https://www.newvistacorp.com/contact/>. Fill in the blanks and send it to main@newvistacorp.com. Or you can get help by calling this U.S. telephone number: 1-410-342-3820, then 0, and then ask for Applications Assistance. We speak English and Spanish. A New Vista Applications Engineer will help you select the proper Thread Unit and Thread Gage or Chasing Members — and work with you if you need a special, or a system.
